PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years building React, Next.js and TypeScript interfaces for multi-tenant B2B SaaS platforms — role-based dashboards, permission-driven admin screens, data-dense workflow tables and print-accurate document rendering across manufacturing ERP and legal-tech domains. Backed by full-stack experience in Node.js, NestJS and PostgreSQL.

TECHNICAL SKILLS

Core	React, Next.js 14 (App Router, SSR / RSC), TypeScript, JavaScript (ES6+), HTML5, CSS3
Styling / UI	Tailwind CSS, responsive design, component architecture, design systems, Framer Motion
State / Data	tRPC, React Query, React Hook Form, Zod, Redux, server-side pagination, data-table patterns
Visualisation	Highcharts, Recharts, MIS and analytics dashboards, Excel / CSV export (ExcelJS)
Rendering	React SSR to PDF (Puppeteer), print-fidelity templating, multi-tenant theming
Also	Node.js, NestJS, PostgreSQL, Drizzle ORM, NextAuth, AWS, Docker, Git, GitHub Actions

EXPERIENCE

Frontend Engineer — Product July 2022 – Present

Wysbryx Technologies Pvt. Ltd. (formerly Deedbee Social Ventures) · *Bengaluru, India*

NKE Wire Assembly ERP — manufacturing ERP system · Jan 2026 – Present nkegroup.com

- Built interfaces across the admin, user, engineering, pricing and work order modules of a multi-tenant manufacturing ERP on a Next.js 14 App Router + tRPC codebase covering a ~115-table domain model.
- Built the role and permission management UI — a matrix of sub-modules against view, create, edit, approve, delete and download rights — which drives what every other screen in the application renders.
- Built permission-aware rendering so actions hide, disable or fall back per user role consistently across modules, rather than each screen implementing its own access check.
- Built the engineering module's specification and compliance forms with Zod-validated schemas and sections conditional on product type (single-interface, dual-interface, RF cable assembly).
- Built pricing and quotation interfaces — multi-step cost entry forms, live-calculating BOM tables and quotation builders where margin, freight, FX and MOQ inputs cascade into dependent calculated fields.
- Built work order, packing list and address sheet screens with document preview and download over server-rendered PDF and Word output.
- Standardised shared form primitives — React Hook Form wrappers, required-field indicators tied to real Zod validation, and a single dropdown deselect gesture — into one design-system pattern reused across every module.

Nirnai — legal due-diligence platform for banks and NBFCs · Jul 2022 – Jan 2026 nirnaitech.ai

- Built the Next.js 14 / tRPC web app for a B2B platform serving bank and legal-firm tenants, with per-tenant branding, SSO and native login, and RBAC across roles, permissions, scopes and data groups.
- Built role-based dashboard home pages with layouts and state tailored to each user type, and MIS analytics visualisations in Highcharts for case tracking and portfolio reporting.
- Implemented valuation and vetting workflows with role-specific field visibility and validation, plus a user points-allocation system with filtering, loading and empty states.
- Led migration of the report system from untyped EJS templates to a typed React SSR architecture rendered to PDF via Puppeteer, building a PARA / LIST / TABLE / IMAGE section dispatcher and shared component library reused across 25+ lender templates.
- Authored lender-branded report templates (IDFC, RBL, IIFL, Ugro, TruHome) with dynamic logo and colour theming, and shipped a multi-page encumbrance risk report and a property valuation report.
- Built case-management screens covering status tracking, assignment views and query / response threads between lender and legal users, with server-side filtering and Excel export.
- Built document upload and preview flows with drag-and-drop, format and size validation, and per-tenant storage buckets.

CLIENT PROJECTS

bSkilling · edtech LMS for corporate and government training programmes — full front-end build bskilling.com
SFJ Business Solutions · enterprise upskilling and certification portal with course catalogue and enquiry flows sfjbs.com
Neo San · WEF-backed cleantech sanitation and waste-management platform — front-end neosan.in
Winfomi · Salesforce consulting partner site with service and case-study sections — front-end winfomi.com
Madhur Pharma · contract manufacturer of pharmaceuticals, cosmetics and nutraceuticals madhurpharma.in
Alt Tech Consortium · alternative-technology industry consortium and member directory alttechconsortium.in
True & Fair · professional advisory and compliance services site trueandfair.pro

EDUCATION

Diploma in Computer Engineering — Model Polytechnic College, Vadakara · CGPA 8.51 / 10.0 2016 – 2019
