PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years building and scaling multi-tenant B2B SaaS platforms in React, Next.js, TypeScript, Node.js, NestJS and PostgreSQL. Experienced in REST and tRPC API design, RBAC and tenant isolation, background job systems, document-generation pipelines and AI-powered document workflows — across manufacturing ERP and legal-tech domains.

TECHNICAL SKILLS

Frontend	React, Next.js 14 (App Router), TypeScript, tRPC, Tailwind CSS, React Query, Highcharts, Recharts
Backend	Node.js, NestJS, Express, REST APIs, tRPC, API design, Drizzle ORM, Redis + Bull queues, Python
Database	PostgreSQL (100+ table schemas, recursive CTEs, advisory locks, migrations), MySQL, MongoDB
Cloud & DevOps	AWS (Lambda, EC2, RDS, S3, SES), Google Cloud (Vision, Storage), Docker, Git, GitHub Actions, PM2, Nginx
AI / Documents	OpenAI API, Google Vision OCR, Puppeteer, React SSR PDF, DOCX generation, ExcelJS
Practices	Multi-tenant isolation, RBAC matrices, JWT / NextAuth SSO, job queues, Vitest, Playwright

EXPERIENCE

Full Stack Engineer — Product

July 2022 – Present

Wysbryx Technologies Pvt. Ltd. (formerly Deedbee Social Ventures) · *Bengaluru, India*

NKE Wire Assembly ERP — manufacturing ERP system · Jan 2026 – Present nkegroup.com

- Full-stack development on a multi-tenant manufacturing ERP (Next.js 14 App Router, tRPC v11, Drizzle, NextAuth) spanning engineering specs, compliance, costing, pricing, quotations, work orders and packing lists across ~115 PostgreSQL tables.
- Built the admin and user modules — user and role CRUD with a permission matrix resolving user → role → sub-module → permission across view, create, edit, approve, delete and download flags, enforced on every sensitive mutation.
- Consolidated five divergent ad hoc admin checks into one exact-match role resolver shared server and client side, removing a class of bugs where roles like “Sales Admin” passed substring-based admin gates.
- Built the engineering module's specification and compliance forms for single-interface, dual-interface and RF cable assembly products, with Zod schemas and field resolution that de-duplicates shared connector parameters.
- Built pricing across traded-goods and cable-assembly paths with FX normalisation to INR, MOQ-based cost selection and margin handling, behind a boundary stripping vendor-internal cost data before payloads leave the sales layer.
- Built the work order module — work orders, contracts, packing lists and address sheets rendered via Puppeteer and a WeasyPrint microservice, with a font fix correcting Word export across all eight document types.
- Enforced multi-tenant isolation by deriving tenant and user identity from the session rather than client input, and closed an S3 access gap by validating every signed-URL request against rows the caller's tenant actually owns.

Nirnai — legal due-diligence platform for banks and NBFCs · Jul 2022 – Jan 2026 nirnaitech.ai

- Full-stack engineer across five services — NestJS API, serverless AWS Lambda backend (~1,100 TS files, 100+ tables), scheduler, PDF microservice and a Next.js 14 / tRPC web app — automating property title verification for loan origination.
- Built an AI document pipeline combining Google Vision OCR with OpenAI to reconstruct and translate Tamil, Telugu, Kannada and Malayalam legal documents into structured English case data.
- Designed a Redis / Bull queue running state-specific automation bots that retrieve Encumbrance Certificates from Andhra Pradesh, Telangana, Tamil Nadu and Karnataka land-record portals, with concurrency locking and retry / backoff.
- Built a config-driven scheduler running 20+ background jobs, eliminating redeployments for routine schedule changes, plus a rule-based engine routing cases initiator → paralegal → lawyer by leave and workload.
- Led migration of the report system from untyped EJS templates to a typed React SSR + Puppeteer architecture, authoring lender-specific templates across 25+ report formats (IDFC, RBL, IIFL, Ugro, TruHome).
- Built a dynamic DOCX engine generating per-bank Deposit of Title Deeds agreements (TruHome, Vridhi, Nivara).
- Shipped Nirnai Sentinel, a batch pipeline classifying post-disbursement encumbrance risk and alerting stakeholders via SES.

CLIENT PROJECTS

bSkilling · edtech LMS for corporate and government training programmes — full front-end build — bskilling.com

SFJ Business Solutions · enterprise upskilling and certification portal with course catalogue and enquiry flows — sfjbs.com

Neo San · WEF-backed cleantech sanitation and waste-management platform — front-end — neosan.in

Winfomi · Salesforce consulting partner site with service and case-study sections — front-end — winfomi.com

Madhur Pharma · contract manufacturer of pharmaceuticals, cosmetics and nutraceuticals — madhurpharma.in

Alt Tech Consortium · alternative-technology industry consortium and member directory — alttechconsortium.in

True & Fair · professional advisory and compliance services site — trueandfair.pro

EDUCATION

Diploma in Computer Engineering — Model Polytechnic College, Vadakara · CGPA 8.51 / 10.0 2016 – 2019
